The Policy Document Glossary applies to this policy.

The following definitions also apply to this policy:

<i>Experienced Researcher</i>	Means someone who is beyond five years (or part-time equivalent) of conferral of a doctorate.

<i>Research Active</i>	Means someone who engages in ongoing research as an inherent part of his or her academic role including curriculum development and teaching.

### 4. Statements and Objectives

4.3. For the first five (5) years after successful completion of a doctoral degree, the doctorate counts as three (3) points.

4.4. Papers delivered at conferences count as a conference paper once but may not be counted again when published.

4.5. The Academic Board may, on the recommendation with reasons of the Research Committee (RC), approve listing a faculty member as research active (not otherwise qualified) if in the opinion of the RC that faculty member is sufficiently conversant with the relevant scholarship to supervise a research masters thesis.

4.6. The Academic Board may, on the recommendation of the RC, approve an early career researcher to supervise a research master's thesis if they have achieved an output equivalent to an average of one (1) weighted output point per year.

4.7. If a person currently performing the role of primary supervisor of a thesis ceases to be recognised as research active, the RC will consider the circumstances and decide in the best interests of the student whether

- to permit the supervision arrangements to continue through to completion
- to permit the supervision arrangements to continue while providing supplementary supervision or specific support to the supervisor and candidate, or
- to replace the supervisor by the following semester.

4.8. Institution, the Dean and Directors of the Office of the Dean—will be expected to meet the set criteria during their time of tenure at a reduced rate, typically but no more than 50%.
